  Viscoelastic Properties of Polymers, 3rd ed., (4) G99
Branching, long chain, of Hevea (NR), (1) 34
Butadiene-acrylonitrile copolymers, See nitrile rubber
Butyl rubber (IIR), carbon black-filled, response to cyclic loading, (4) 718
  vulcanization by 2-pentadecyl benzoquinone-dioxime, (4) 692
  developments in Polymer Stabilization—4, (5) G118

Cables, oil well submergible, testing of, (1) 52
Carbon black, agglomeration, effect of temperature, (1) 42
  dispersion measurement by optical means, (4) 698
  effect of loading on large static deformation (4) 857
  effect on autohesion, (1) 101
  effect on treadwear, (2) 427
Carbon black-filled butyl rubber, response to cyclic loading, (4) 718
Carbonaceous filler, MDC as alternative (abstract), (1) 193
Cellulose fibers, short, for reinforcement of curved automotive hose, (2) 277
Chain branching, long, of Hevea, (1) 34
Chemical Abstracts Service, information for the rubber industry (abstract), (1) 185
Chemical information (abstract), (1) 184
Chemorheology, of IR vulcanizates, (1) 1
Chloropropyltriethoxysilane, modifier for white filler for halogen rubbers (abstract), (5) 1155
Coating, water-resistant release, for uncured rubber, (5) 1124
Coatings, water-based siloxane, (5) 976
Compression set, low, of nitrile rubbers (NBR), (1) 170
Computer optimization, of X-ray systems for tire inspection (abstract), (5) 1155
Conductive rubber, soft, by blending of elastomers, (4) 820
Conductivity, electrical, temperature effect in carbon black-filled polymers, (1) 42
Continuous vulcanization, microwave technology (abstract), (1) 183
Copolymerizable antioxidants, hindered phenol, for polyether-ester polymers, (5) 1155

*Prepared by L. W. Brock

Crack propagation, (1) 15
Crazing mechanism, combined with large plastic deformation, to explain rubber-toughened plastics, (5) 1011
Creaming agent, effect on surfactant adsorption, (1) 124
Creep, long-time, in pure-gum rubber vulcanizate, (2) 331
Curing, of guayule, (1) 24
Curing agents, effect on physical properties of liquid polymercaptan rubbers (abstract), (1) 187
Curing system, for bonding steel cord to rubber, (4) 797 for tough silicone rubber (abstract), (1) 182
Cyanoacrylate adhesives (abstract), (5) 1154
Cyclic loading, of carbon black-filled butyl rubber (IIR), (4) 718

Data acquisition, for GPC (review), (3) 535
Deformation, large static, influence of carbon black loading, (4) 857
Deresination, of guayule, transport phenomena, (4) 871
Detectors, for GPC (review), (3) 535
Die swell, extensional flow related to, (1) 61
Diene copolymers with polyhalophenyl acrylic monomers, intrinsic flame retardance, (4) 767
Differential scanning carlorimetry (DSC), for evaluating antioxidant efficiency, (1) 134
Downhole environments, fluoroelastomers for, (1) 146
Dynamic properties, of polymers, influence of carbon black loading, (4) 857

Elastic moduli, of rubber-plastic blends, (1) 91
Elastomeric block polymers (addendum), (1) 181
Elastomers, model networks, (4) 809
Electrical resistivity, of carbon black-filled polymers, (1) 42
Electron microscopy, of NR latices, (1) 124
Epoxy adhesives, markets (abstract), (5) 1156
Epoxy group, as cure site for vulcanization of fluoroelastomers, (4) 779
Epoxy resin, toughening by amine terminated reactive liquid polymers, (2) 374
Ethylene-acrylic elastomer, injection molding (abstract) (1) 183
Ethylene-propylene-diene polymers (EPDM), liquid 1,2-polybutadiene as co-agent (abstract) (1) 182
Ethylene-propylene elastomers, thermoelastic and strain-birefringence measurements (abstract), (1) 190
Extensional viscosity, significance in processing, (1) 61
Extrusion, effect of rheological properties on swell during, (5) 905
factory, simulation by die swell test, (2) 439
significance of extensional flow, (1) 61
resistance of fluoroelastomers to in downhole environments, (1) 146
Extrusion-shaping, of hose reinforced with short cellulose fibers, (2) 277

Filled elastomers, model, tear and tensile strength, (5) 1003
Finite element analysis of stress in cord adhesion tests, (4) 835
of stress in radial tire inflation, (4) 751
Flame retardance, intrinsic, of diene-polyhalophenyl acrylic copolymers, (4) 767
Flaw growth, in aircraft tires, determination by holography (abstract), (5) 1157
Fluoroelastomers, for downhole environments, (1) 146
vulcanization through epoxy cure sites, (4) 779
Friction and adhesion of elastomers, (5) 944
Fuel resistant polymers, (1) 155
Fusion, of PVC resins in plastisols, (5) 1096
